PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with hands-on experience developing scalable web applications using **JavaScript, React, Node.js, Express.js Java, Spring Boot, Angular, Python, Postgres SQL and MySQL**. Skilled in designing RESTful APIs, building responsive user interfaces, implementing secure authentication, and optimizing application performance. Experienced working in Agile environments with expertise in software development, debugging, testing, database management, and cloud-ready deployments. Passionate about developing high-quality, scalable software solutions and continuously learning modern technologies.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python, SQL, C++, HTML5, CSS3
Frameworks & Libraries: Spring Boot, Spring MVC, React.js, Angular, Node.js, RESTful APIs
Databases: MySQL, Oracle
Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Eclipse, NetBeans
Testing: JUnit, Jest, Jasmine
Concepts: Object-Oriented Programming (OOP), REST APIs, Authentication & Authorization, Responsive Web Design, Agile, Scrum, SDLC, MVC Architecture
Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern Dataque
Software India Pvt. Ltd.
March 2024 – November 2024
Key Responsibilities & Achievements

- Developed enterprise web applications using **Java, Spring Boot, React, Angular, and MySQL**.
- Designed and implemented scalable RESTful APIs for seamless frontend-backend communication.
- Built responsive and reusable UI components, improving usability across multiple modules.
- Implemented secure authentication and role-based authorization.
- Optimized SQL queries and database performance for faster application response.
- Participated in Agile sprint planning, daily stand-ups, code reviews, and production deployments.
- Used Git and GitHub for source control, feature branching, and collaboration.

- Performed unit testing using JUnit, Jasmine, and Jest.
- Assisted with Docker-based deployments and application maintenance.
- Resolved application defects and enhanced overall software quality.

PROJECTS JOB-WORLD – Job Search Platform

Technologies: Python • Angular • MySQL • REST APIs

- Developed a full-stack job search and recruitment platform enabling employers to post jobs and candidates to discover and apply for opportunities.
- Built interactive dashboards for recruiters and administrators to monitor job postings, applications, and hiring activity.
- Designed and implemented RESTful APIs connecting frontend applications with backend services for job management, user profiles, and application workflows.
- Implemented secure authentication and role-based access control for job seekers, employers, and administrators.
- Optimized database schema and SQL queries to improve application performance and reduce response times.
- Enhanced platform scalability through backend optimization, efficient data retrieval, and API performance improvements.
- Deployed the application in a local cloud environment for development, testing, and validation.

HR Management System Click here

Technologies: Java • Spring Boot • React • MySQL

- Developed a comprehensive HRMS for employee, attendance, payroll, and leave management.
- Designed secure REST APIs using Spring Boot.
- Built responsive React interfaces for employees and administrators.
- Implemented CRUD operations across multiple HR modules.
- Added employee search, filtering, CSV import/export, and reporting features.
- Integrated MySQL database with optimized query execution.
- Performed backend testing using JUnit to ensure reliability and stability.

PORTFOLIO - PROJECTS

ATTENDANCE MANAGEMENT SYSTEM – Full-Stack Attendance Platform

Technologies: React • Node.js • Express • PostgreSQL • REST APIs

- Developed a full-stack attendance tracking application featuring secure user authentication, role-based permissions, and real-time punch-in/punch-out workflows.
- Built interactive dashboards for employees and managers to monitor daily attendance logs, work hours, and history.
- Designed relational PostgreSQL database schemas (hosted on Neon) and implemented optimized queries for reliable data retrieval.
- Configured and deployed the backend API service on Render and the frontend application on Vercel with seamless CORS integration and client-side routing.

PERSONAL PORTFOLIO WEBSITE – Developer Showcase Platform

Technologies: React • Tailwind CSS • JavaScript • Vercel

- Designed and developed a responsive personal portfolio web application to showcase full-stack projects, technical proficiencies, and professional experience.
- Built clean, modern, and interactive UI components optimized for performance and seamless cross-device navigation.
- Managed continuous deployment and automated builds on Vercel to ensure high availability and fast load times.
- **Links:** GitHub • Website

EDUCATION

- **Master of Science in Computer and Information Sciences** Sacred Heart University, Connecticut, USA • 2026
- **Bachelor of Science in Computer Science**
  Osmania University, Hyderabad, India • 2024

CERTIFICATIONS

- Java Programming Certification
- Robotic Process Automation (RPA) Certification
- Mahindra Pride Classroom Certification – Naandi Foundation

ADDITIONAL INFORMATION

- Open to **Software Engineer**, **Full Stack Developer**, **Java Developer**, **Backend Developer**, and **Frontend Developer** opportunities.
- Strong analytical, communication, and problem-solving skills. Passionate about building scalable, high-performance software solutions.
